When you turn on Intent...

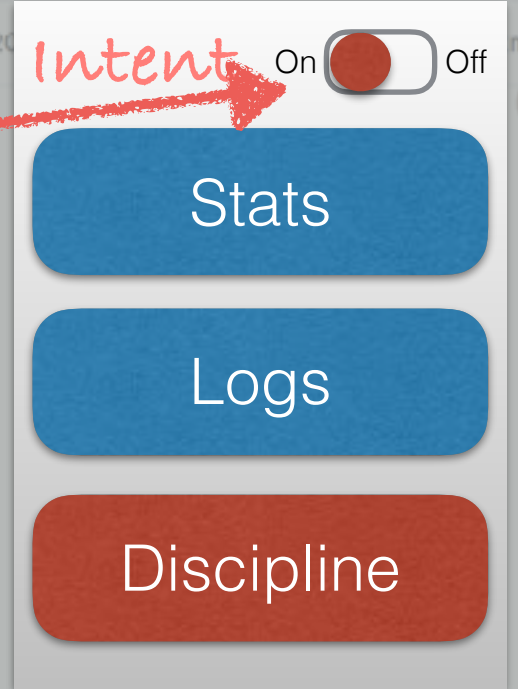

Every time you open up your browser or a new tab, Intent asks what your intention is to go on the internet

Why?

- It reinforces you to keep on track when browsing
- Keeps you more mindful of your browsing habits
- This feature is for you (you don't have to fill it in)

And it asks you whether this is productive or not

- if productive, it lets you proceed to browse
- If un-productive, it asks you how you feel currently and why (optional)
 - Gives you a list of other activities you can do

What do you intend to accomplish during this session?

[Enter response here]

Is this for recreational use?

Yes

No
